

#### Welcome to the New Product & Technology Theater AHR Expo 2013

## New Product & Technology Theater Agenda

*The MicroGroove Advantage* John Hipchen, The Copper Alliance, Booth 5524

**Copper Tubing in R410A and CO<sub>2</sub> Applications** Dr. Charles Stout and Chris Mueller, Mueller Industries, Booth 2545

High Efficiency MicroGroove Coils for Commercial and Indusrial Applications Matt Holland, Super Radiator Coils, Booth 1737

> *A New Era of Coil Manufacturing* Newell Franks, Burr Oak Tool Inc., Booth 2957

*New Copper Alloys for the ACR Industry* Ed Rottmann, Luvata, Booth 1545

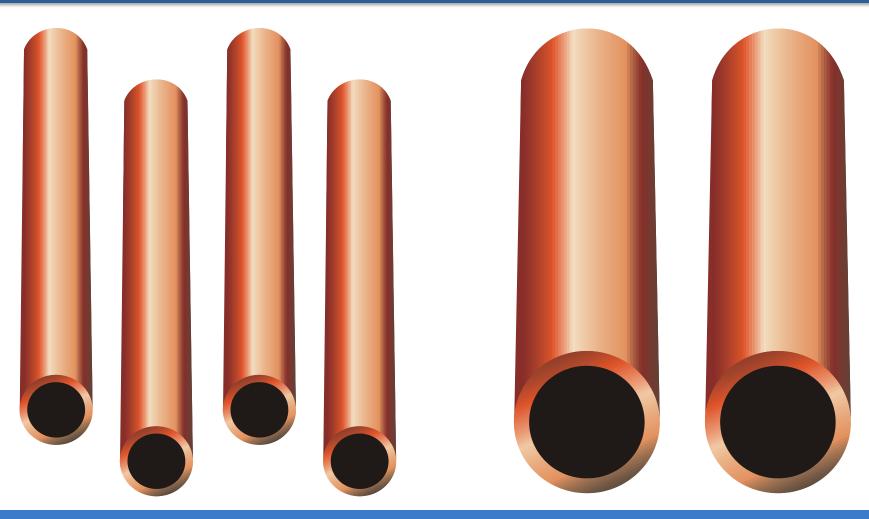

**Optimization of Copper Tubes for ACR Tube Applications** Steffen Rieger, Wieland-Werke AG, Booth 4156

# Reduced Tube Diameters = Increased Heat Transfer

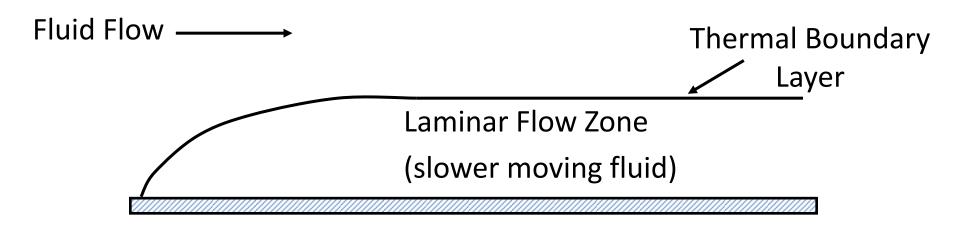

the micr&groove. advantage

## Increased Heat Transfer with Less Material

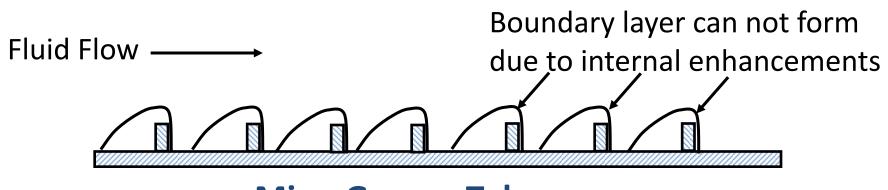

#### **Development of Boundary Layers**

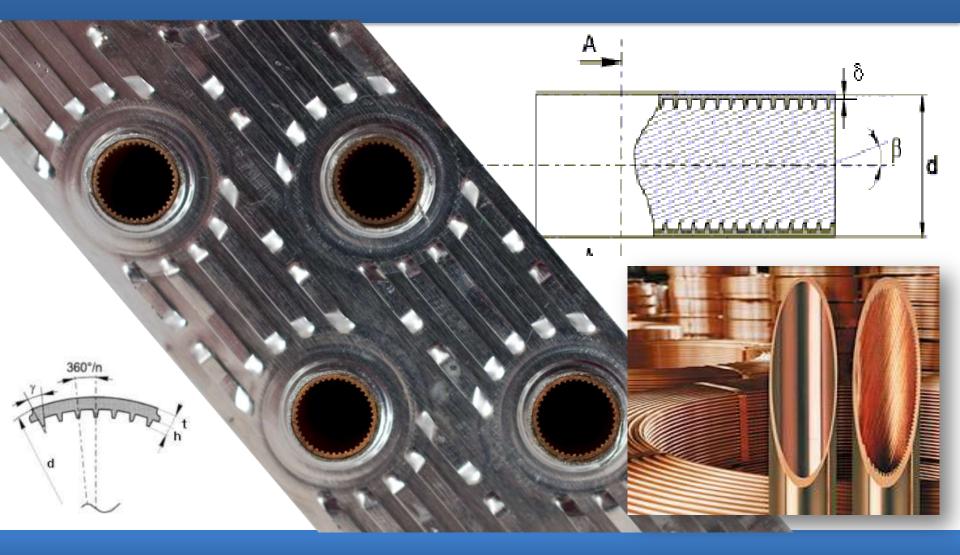

#### **Smooth Internal Tube Wall**

#### **Reduction of Boundary Layers**

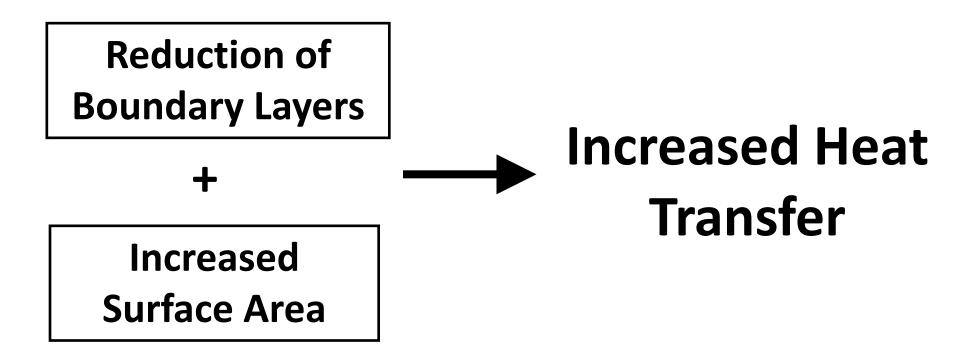

**MicroGroove Tube** 

#### **MicroGroove Features**

the micr&groove. advantage

## MicroGroove Technology Advantages

#### **Residential Applications**

# Refrigerant Charge is Reduced with Small Diameter Tubes

| Manufacturer              | Kelon                   | Midea                  | Haier                  |
|---------------------------|-------------------------|------------------------|------------------------|
| Description               | 5K - BTU<br>window unit | 2600 W<br>split unit   | 2600 W<br>split unit   |
| Refrigerant               | R22                     | R410a                  | R290                   |
| Coil design, original     | 7mm evap.<br>7mm cond.  | 7mm evap.<br>7mm cond. | 7mm evap.<br>7mm cond. |
| Refrigerant Charge (g)    | 349.8                   | 920.0                  | 360.0                  |
| Coil design, optimized    | 5mm evap.<br>5mm cond.  | 7mm evap.<br>5mm cond. | 7mm evap.<br>5mm cond. |
| Refrigerant Charge (g)    | 243.8                   | 730.0                  | 275.0                  |
| Refrigerant Reduction (%) | 30.3                    | 20.6                   | 23.6                   |

### Commercial & Industrial Applications -Outdoor Condensing Units

the micr&groove\_advantage

# Commercial & Industrial Applications -Refrigeration Applications

the micragroove. advantage

# Benefits of Manufacturing Coils with Small Diameter MicroGroove Tubes

- Energy Efficient
- Less Material
- Less Refrigerant

- Proven, Economical Manufacturing Process
- Minimal Equipment and Process Changes
- Established World-Wide Supply and Support

## New Product & Technology Theater Agenda

*The MicroGroove Advantage* John Hipchen, The Copper Alliance, Booth 5524

**Copper Tubing in R410A and CO<sub>2</sub> Applications** Dr. Charles Stout and Chris Mueller, Mueller Industries, Booth 2545

High Efficiency MicroGroove Coils for Commercial and Indusrial Applications Matt Holland, Super Radiator Coils, Booth 1737

> *A New Era of Coil Manufacturing* Newell Franks, Burr Oak Tool Inc., Booth 2957

*New Copper Alloys for the ACR Industry* Ed Rottmann, Luvata, Booth 1545

**Optimization of Copper Tubes for ACR Tube Applications** Steffen Rieger, Wieland-Werke AG, Booth 4156
